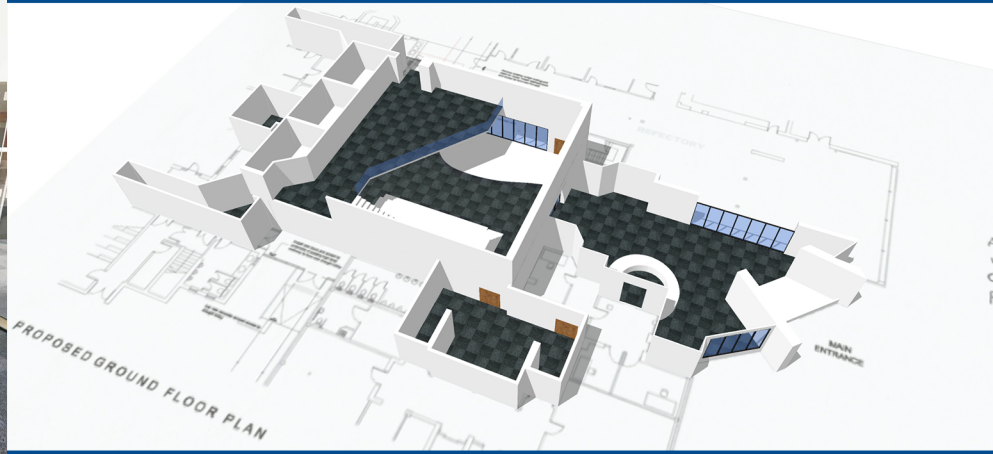
Wilberforce Sixth Form College
Completed in 2019

The project consisted of circulation areas and small study rooms - a total of over 820 square metres. Heckmondwike Supacord carpet tiles was specified for the project because of its durability, cost efficency and offered a wide range of colours for the client to choose from.

A combination of Supacord Anthracite (Grey) and Willow (Green) was installed throughout. The heart space - a two storey open plan learning space - uses the carpet tiles to help zone the different learning areas within the space.

The installation was completed within 1 week during the half term to avoid disruoption with day-to-day activities within the college.



Products Installed

Heckmondwike Supacord Carpet Tiles Anthracite. Heckmondwike Supacord Carpet Tiles Willow.
